The Authority’s jurisdiction spreads over an area of 2685 sqkms and covers 6 (six) districts of Uttar Pradesh namely Gautam Budh Nagar, Mathura, Aligarh, Hathras, Agra and Bulandshahr. Five greenfield townships are being planned in this area which will be developed on the smart cities concept.

The area is proposed to be developed in phases wherein the work for Phase I of the development has already begun. The achievements so far are as follows:

- Phase I lies in Gautam Budh Nagar District and is a part of N.C.R.
- Area is 580 sqkm
- Approx. 19,575 ha has been planned and approved for urbanization
- ~12000acre has been acquired
- ~4000acre undisputed land is available for immediate allotment
- Various allotments for residential, commercial and industrial land use have been made – a snapshot of these allotments is as follows:
  - 21,000 residential plots have been allocated in Sector 18 & 20
  - 11 townships with area of about 100-200 acre have been allotted
  - ~125,000 residential flats are under construction
  - ~1000 industrial plots of various sizes
- Two universities are functional – Gautam Budha University and Noida International University
- 2500 acres of Jaypee Sports city has been developed
Jaypee Sports International Pvt. Ltd. is developing Jaypee Greens Sports City in Yamuna Expressway Industrial Development Authority - a modern, world-class city anchored by business, sports, health and educational enterprise. SDZ primarily comprises of:

- **Core Area:** Sports as Core Activity, F1-centric development comprising race track, sports & entertainment related activities – 351.12hec.
  - Formula 1 Race Track & Supporting Buildings
  - International Cricket Stadium
  - Football Stadium
  - Hockey Stadium
  - Multipurpose Sports Indoor Stadium
  - Swimming pool

- **Non-core Area:** complementary high end commercial & residential districts amid boulevards – 648.88hec

The new city will be built around an extensive park, lake and forest system. It will be anchored by a park boulevard that spans and interconnects the entire city. The boulevard will incorporate transit, active and passive recreational areas, a comprehensive storm water management system, and geothermal district cooling. The city will contain a series of lakes and water features that establish focal points and activity centers, and function as part of a comprehensive, surface-based storm water management system designed to naturally filter water and return it to the ground.
